

Help Make Inflatable Set up Faster.....

Inflatable Checklist

The area on which the inflatable will be placed is level and clear of debris.

There are no overhanging trees or power lines.

If it is a water piece, that a water spicket is within 75ft of inflatable location. Customer is to provide good quality garden hose.

Proper 110V electrical outlets, with 20 amp circuit breaker, are within 75ft of inflatable location. Customer is to provide two 12/3 or 10/3 extension cords 50ft in length

IMPORTANT THINGS TO REMEMBER:

- A grassy area is preferred to avoid bruised knees and scraped elbows!
- In the hottest summer months, please do not place inflatable in direct sunlight.

ON THE DAY OF DELIVERY:

- The setup location & the path leading to the setup location should be cleared.
- Be prepared to provide electricity, or show our staff where outlets are located.
- Any underground irrigation or power lines need to be clearly flagged or marked.

SAFTY FIRST:

- Supervision by an adult is required at all times.
- NO food, gum, drinks, sharp objects or SILLY STRING are permitted inside Any rental piece.
- To avoid injury, entry and exit points should never become crowded and always be approached in a calm and orderly fashion
